VOLVO 850 & 70 series '97 – '99 models

VOLVO 850 C70/S70/V70 Strut tower to tower brace

Fitting instructions:

1. Car needs to be on its wheels (ie not on jack stands or with wheels off the ground)
2. Undo and remove strut tower top nuts on both sides.
3. On LH side, remove fuse box bracket from strut tower.
4. Remove fusebox from bracket and put fusebox aside.
5. Fit LH strut brace top plate (plates are marked 'L' and 'R' on the underside).
6. Fit fusebox assembly to replacement (or modified) fusebox bracket.
7. Re-fit fusebox and bracket to strut tower, over the LH strut brace top plate. (Similar to photo below)

8. Re-fit strut tower top nuts and tighten
9. Fit RH plate, re-fit strut tower top nuts
10. Fit one end of the cross bar and check for correct length. Shorten or lengthen bar as required.

11. Fit strut bar to RH tower plate, adjust and tighten as required.
